ENGINEERING TECHNICIAN (CONSTRUCTION)

MLC #0384 1-6 PD#FEC-PRY212-002

This position is located in the Public Works Department, Field Engineering and Acquisition Division (FEAD), Naval Facilities Engineering Command, Far East. The Facilities Engineering and Acquisition Division (FEAD) provides engineering and contractual procurement services for U.S. Navy, Marine, and other government appropriated and non-appropriated fund activities. These contracts involve construction, repair, maintenance, engineering, and design services encompassing all engineering disciplines, including safety and environmental requirements. The employee coordinates many facets of work with other Engineering Technicians to arrive at mutually satisfactory approaches and solutions to technical engineering problems, and independently selects, interprets and applies standard guidelines, while modifying, adapting, and making compromises to meet the requirements of each assigned project. The incumbent reports directly to the Supervisory Engineering Technician and works with low to moderate technical supervision.

- A. Technical review, field engineering, problem solving and inspection 65%
 - 1. Prior to contract award, reviews 90% design construction plans and specifications for errors and omissions, feasibility of construction and operation, and other potential problems. Visits project sites during reviews and recommends design and material revisions to meet actual or potential field conditions. 5%
 - 2. Coordinates and attends pre-bid, pre-construction, and bid verification site examinations and conferences to discuss and clarify principle features and technical requirements of construction projects. 5%
 - 3. Reviews contractor shop drawings, catalog cuts, certifications, test reports, samples, and other required submittals for conformance with contract requirements. Recommends approval or disapproval of contractor submittals to Construction Management Engineers. 5%
 - 4. Performs on-site construction inspection and assessment of contractor quality control organizations on each assigned project to ensure compliance with contract plans and specifications. Makes recommendations to Construction Management Engineers for changes to contractor quality control organizations due to poor performance. 15%
 - 5. Ensures that all phases of construction work are completed in accordance with approved construction schedules and recognized industry standards, and are in compliance with contract requirements. 5% (items #5)
 - 6. Assists in the coordination of work to be done by other government agencies, transfer of government furnished materials and equipment to the contractor, and obtaining approval for utility outages and road closures from cognizant

user activities.

5%

7. Becomes thoroughly familiar with all pertinent contract documents relative to assigned projects and assists contractors with understanding and implementation of the requirements contained therein.
8. Enforces the requirements of the U.S. Army Corps of Engineers Safety & Health Requirements Manual, EM-385-1-1, OSHA standards, base safety regulations, and the requirements of all other nationally recognized safety organizations. 5%
9. Conducts Pre-final and Final acceptance inspections of completed facilities with designers, customers, and end users of completed facilities. 5% (items #9
)
10. Ensures on-site maintenance and accuracy of contractor As-Built drawings to ensure a complete and accurate account of changes to planned construction.
11. Reviews contractor construction schedules, and coordinates complex work schedules with customers and user activities to assure completion of facilities in a timely manner with a minimum of interruption to ongoing government operations. 5%
12. Performs simple engineering computations on various aspects of electrical, mechanical, and structural systems. Investigates technical field problems and provides recommended solutions. Prepares drawings and sketches when needed to clarify recommended solutions. 10%

B. Reports and Quality Assurance Plan

15%

1. Reviews contractor's Daily Production and Quality Control Reports to ensure that all on-site activities are correctly documented, and prepares Quality Assurance Representative's Report to indicate agreement or disclose areas of disagreement and concern.
2. Conducts routine on-site reviews of contractor Deficiency Status Logs, Testing Logs, Visitors Logs, and other pertinent on-site documentation for completeness and accuracy.
3. Prepares and maintains a Quality Assurance Plan for each assigned project awarded over \$1 million. Utilizes each Quality Assurance Plan in the field to plan, coordinate, and execute inspection and government testing of contractor installed systems and facilities.
4. Prepares Contract Non-Compliance Notices and issues in coordination with entries in the contractor's Deficiency Status Log. Conducts follow up to those notices to ensure correction and documentation into official contracting files.
5. Prepares monthly contract status reports as required for purposes of monitoring and reporting progress of ongoing and completed construction to higher levels of authority.

C. Contractor Payments and Change Orders

10%

1. Reviews contractor progress payment invoices for completeness and accuracy. Verifies work in place, and makes recommendations for payment or retention of funds to Contracting Officers.
2. Reviews contractor Requests for Equitable Adjustment and time extensions, and provides recommendations and comments as to the merit and quantum of each request.
3. Prepares government cost estimates for minor change orders and participates in contract negotiations with contractors and Construction Management Engineers.
4. Prepares no cost, no time field change documentation and submits to Construction Management Engineers for review and approval.

D. Contract Completion and Closeout

5%

1. Ensures that all required warranties, keys, spare parts, excess materials, test reports, and all required documentation are received from contractors prior to final payment.
2. Ensures that all construction deficiencies found during pre-final and final inspection of construction are corrected, and all operational testing is successfully conducted prior to final payment.

E. Other

5%

1. Performs other duties as assigned by higher authority.
